

CASTING SHEET

*Deichmann Elefanten / brand campaign***Details**

Agency	
Name	
Age	
Booking Base	
Any shoe jobs during the last year? Which brands?	
Blocked dates during production period? (19 - 24/01/22)*	
Notes	

IMPORTANT:

Please measure shoe size with the template attached. Follow the instructions and then take photos which clearly state the current shoe size.

*please note that blocked dates stated here will be the only ones considered for casting approval. With signing up, the talent assures to be available on all other dates until final shooting dates have been communicated by production.

The production reserves the right to assign the roles MAIN TALENT & FEATURED EXTRA (all role categories), as well as HERO and FALL BACK (children) until after the fitting. By submitting my casting I accept to be assigned all possible roles within my role category (e.g. woman, girl shoe size 20-22, etc.)

By signing the casting sheet I accept the terms and conditions that have been announced to my agency by production:

 Place, Date

 Signature
Personal Details

Notes	

SUBMIT FOLLOWING CASTING MATERIAL:

- Signed casting sheet
- Current polas (also with close up of hands)
- Sedcard
- Photos of shoe size measure
- Video with short introduction (name, age, home town, hobbies etc.) + show the whole body from every side + close up of face from every side
- Video acting scene (regarding to role, please see instructions on page 2)

Please make sure the videos are of good quality (no noise, proper resolution, enough light, neutral background) and we need an mp4 or mov file.

Please wear neutral clothing without stripes, little patterns etc.

Important: Print the template on A4 paper format with 100% size.

Template for measuring children's feet

Be sure to measure both of your child's feet. If the feet are different sizes, use the larger size.

Measure in the afternoon or evening, as feet can still expand during the day.

Measure while standing and wearing socks, and loosen the socks slightly at the toes.

How to determine the appropriate children's shoe size

1. Check the true-to-life scale of the printout with a measuring tape or ruler.

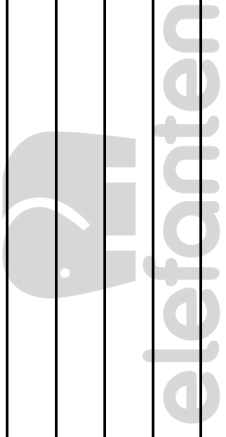

2. Fix the printed template to the floor so that it cannot slip.

3. Place the child's foot on the paper with the heel at the marked position. The other foot must be parallel so that the weight is evenly distributed on both feet.

4. Gently stroke the toes so that they relax.

5. Now read the foot length at the longest toe.
